**2013**

 BORN IN  
SWITZERLAND

# THANKS...

You have in your hands the second COMPRESSPORT® catalogue.

What is presented in this brochure is the result of the work of a committed and passionate group of people who have a very strong belief in the COMPRESSPORT® project. This team has dedicated many hours to the project and is convinced that this is only the beginning.

It is not by coincidence that COMPRESSPORT® is now present in 55 countries around the World: the effort, the sacrifices, and more than anything the amazing team work since the launch of COMPRESSPORT® in 2008 is now bearing fruit.

I am very proud to present to you this catalogue which showcases our latest products. I also want to thank you all because we feel that you are all part of the Compressport family: elite athletes, weekend warriors, amateurs, clubs, distributors, retailers and all the staff... Each and every one of you plays a role in the amazing COMPRESSPORT® story!

Every day more and more professional and amateur athletes trust and wear our products. Our goal still remains the same: to become the benchmark compression brand in the wide world of sport. Our objective is to develop cutting edge products for all sports. Compression is not reserved for an elite few or for specific sports. We respond to the problems that ALL athletes face daily. Whether to improve performance, enhance recovery or help them travel in the best possible condition. And this is true for all sporting disciplines!

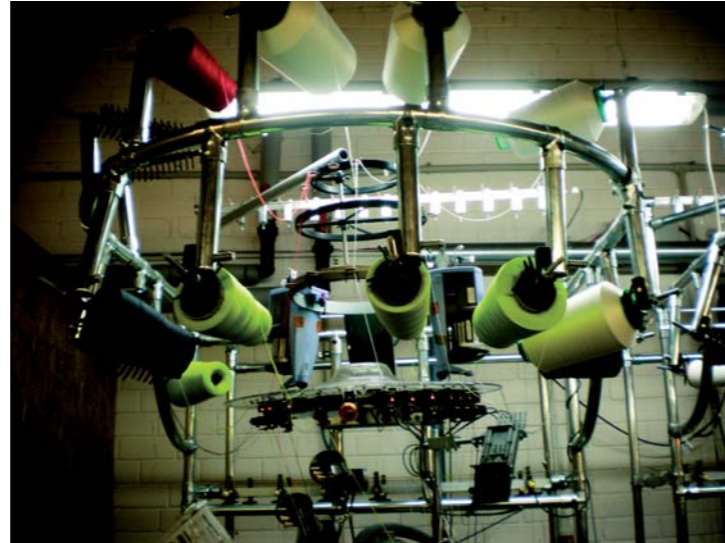

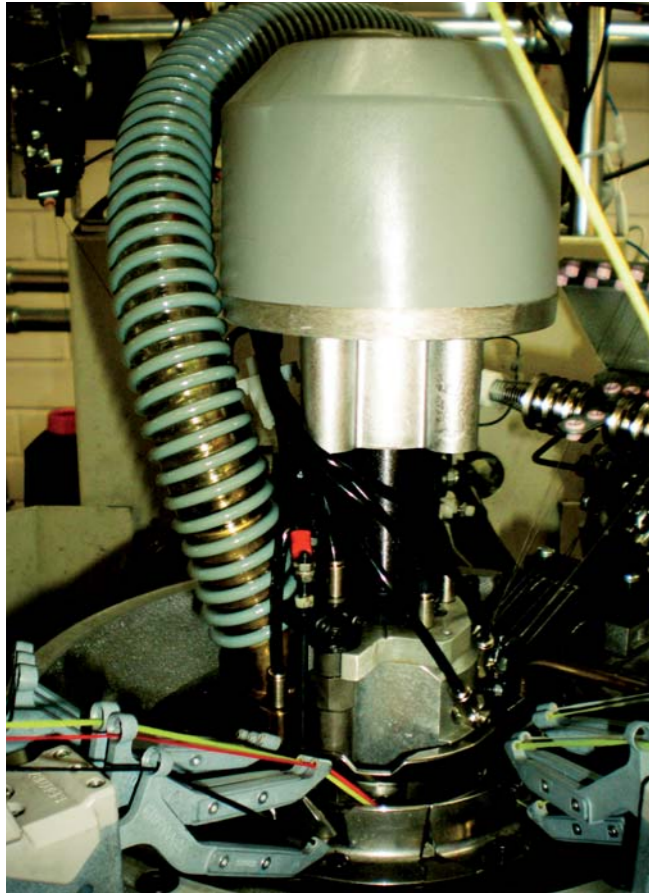

We are training, racing and winning events all over the planet all year long. Our staff and athletes often compete in extreme conditions and test our products to their absolute limits. This is how we develop our products, we thrive on technology and quality and our designers ensure we always create modern and innovative designs. We are convinced that you will enjoy the new 2013 range we present to you.

We thank you again for your support and trust. We now invite you to keep believing in us and to walk/ride/run/swim... with us into the future of compression!

Thank you so much!

Jordi Solé  
CEO  
Compressport International

## FACTORY MEDICAL BACKGROUND

**COMPRESSPORT®**, a high-end quality product with a medical background.

We are proud to be a 100% Swiss company with 100% European made products.

Our products are designed and developed in Europe.

The machines we use are 100% European made.

The yarns / dyes used are 100% European.

All our products use fabrics and yarns that meet the Oeko-Tex® Standard 100: Independent controls on harmful textile substances to make sure the products do not pose any health risk.

Our products are born from the collaboration between doctors, athletes and manufacturers specializing in medical compression.

In just 3 years, **COMPRESSPORT®** has redefined the compression apparel market...

Coming from a medical research background and specialist in sports compression, our range of products is like no other. Combining the highest technologies with the latest trends, our aim is to always innovate and surprise our athletes. We respond to the problems that athletes face daily.

Whether to improve performance, enhance recovery or to help them travel in the best possible conditions. Compressport contributes to improve the overall well-being of the athletes in their everyday life. We now have over 500 professional athletes endorsing and using our products on a daily basis.

Our manufacturing processes guarantee the suitable level of compression for the use of the product.

The machines used are specifically able to graduate to the millimetre different compression zones on targeted muscle areas.

Throughout the production cycle, the machine runs check to verify the compression of the product being produced.

We use the Salzmann group in Switzerland for the measurement and validation of compression classes on all our products. The Salzmann test apparatus is internationally recognized as the unit leader and technically the most accurate for measuring compression.

Current and past world champions wear COMPRESSPORT® products. Before being released, all our products are tested by all those top level athletes who give us their insights and feedback. This ensures our products meet exactly the needs of the athletes.

During the development of a product, every aspect is examined in details. We study the morphology of athletes, we test hundreds of different yarns and fabrics, we work on seamless constructions to maximise the efficiency and lifetime of the product, we test the compression rates during the production phase.

## R2 “RACE & RECOVERY”

During effort, COMPRESSPORT® reduces lactic acid and shocks. COMPRESSPORT® protects you from muscular fatigue and damage. After effort, COMPRESSPORT® speeds up recovery and leaves you feeling great. “30-day Satisfied for Reimbursed” guarantee. Try it, even by curiosity!

### Intense effort with COMPRESSPORT®

Its compression actions reduce greatly the accumulation of toxins round the leg area, especially when the effort is prolonged. The sheathing calf allows a more efficient venous feedback from feet to the heart and a better oxygenation thus facilitating muscle recovery during exercise.

### COMPRESSPORT®, muscular-tear prevention

The COMPRESSPORT® fibre is designed to reduce shock waves generated by running on hard ground. It therefore significantly reduces the oscillating movement of the muscles (muscle fibres), slowing down muscle fatigue thereby limiting risks of injury.

### COMPRESSPORT® for your recovery

After sport COMPRESSPORT® accompanies you throughout your recovery so you can regain light feeling legs, ready for another training session.

**MASSAGING-EFFECT FIBRE**

Every movement triggers a micromassage providing well being and lightness.  
Patented fibre.  
2-YEAR GUARANTEE

**SHOCK ABSORBER**

The 360° compression dampens the “shock wave” effect on muscles, veins and joints

**ULTRALIGHT**

Wet or dry, COMPRESSPORT probably remains the most lightweight (does not retain water).

**ULTRARESIST**

In normal use COMPRESSPORT is tear proof.

**DTOX**

Studies show a significant reduction in lactic acid during effort.

**ANTI-FATIGUE**

The shock and vibration absorption on muscles, veins and joints increases resistance to effort.

**RECOVERY**

Accelerates venous return preventing blood from stagnating in calves, ischia and quadriceps therefore making your legs feel ultra light.

**QUALITY GUARANTEE**

COMPRESSPORT guarantees the exchange of your product. ( see conditions on our website <http://www.compressport.com>)

## UR2 “ULTRA RACE & RECOVERY”

COMPRESSPORT® innovates yet again by offering you COMPRESSPORT® UR2 (Ultra Race & Recup). Ideal for those who go the whole way and more (Marathon, Ultra, Iron-Man, etc). Every centimetre of fibre is loaded with Thousands of capsules containing 6 essential oils renowned for their soothing and myorelaxing virtues. Make the most of the exclusive dual action Compression + microcaps with essential oils to boost your performance and recovery even further.

### COMPRESSPORT® for your recovery

After sport COMPRESSPORT® accompanies you throughout your recovery so you can regain light feeling legs, ready for another training session.

### Intelligent textile: COMPRESSPORT®

COMPRESSPORT® UR2 are the first to boast the new “micro-encapsulated textile” technology. Millions of micro-capsules of ORGANIC essential oils are embedded in the textile constantly releasing their active ingredients onto your legs. The gradual compression associated with the encapsulated essential oils is the new winning dual-action to ensure well being to your legs!

### COMPRESSPORT®, muscular-tear prevention

The COMPRESSPORT® fibre is designed to reduce shock waves generated by running on hard ground. It therefore significantly reduces the oscillating movement of the muscles (muscle fibres), slowing down muscle fatigue thereby limiting risks of injury.

## US "ULTRA SILICON"

COMPRESSPORT® is for everyone

COMPRESSPORT® is ideal for all sports (Triathlon, Trail/Road Running, Road/Mountain Biking, Football, Gym).

COMPRESSPORT® will be your partner of choice for all your training, racing and recovery needs.

Intense effort with COMPRESSPORT®

COMPRESSPORT® increases efficient venous feedback from your feet to your heart, reducing the accumulation of toxins while increasing oxygenation to the muscles. The US also greatly reduces impact shockwaves and muscle oscillation which helps prevent injury and reduces muscle fatigue. COMPRESSPORT® allows you to push your limits!

COMPRESSPORT® reduces muscle fatigue

COMPRESSPORT® after exercise continues to boost your venous feedback, this improves recovery time, so you can train more often.

There is no need to machine wash your COMPRESSPORT® after each use.

Hand wash in the shower and put them straight back on.

Recover faster with COMPRESSPORT® !

# FOR QUAD

“THE REVOLUTION”

The COMPRESSPORT® ForQuad thigh guard is the only compression product sized to your upper leg muscles, not your waist, enabling optimal compression levels to your quadriceps and hamstrings while also supporting the ITB.

## Enhanced performance

The ultra light COMPRESSPORT® fabric is designed for more effective venous return from the feet to the heart, considerably reducing the build up of toxins in the muscles, particularly during prolonged effort

Muscles benefit from improved oxygenation, helping to reduce the possibility of cramps and injuries

This allows for longer, higher impact sessions with less fatigue and quicker recovery

The COMPRESSPORT® fabric also optimises heat exchange and wicks away moisture, helping to regulate your body temperature

## Injury prevention

The COMPRESSPORT® fabric provides rigidity and support to muscles and is designed to reduce shock waves and vibrations

This helps to prevent muscle tears, joint pain, contractures, micro-injuries and muscle fatigue

## Enhanced recovery

After exercise the COMPRESSPORT® ForQuad continues to accelerate venous return, flushing the toxins from, and increasing oxygenation to, the muscles

This process reduces the possibility of Delayed Onset Muscle Soreness

Damaged muscles repair quicker meaning you can train and compete on fresher legs

Wear the ForQuad under your tri suit, cycle or running shorts. Unlike conventional compression shorts the ForQuad doesn't cover the groin, so it doesn't need to be machine washed after each use – it can be hand washed in the shower then worn again straight away for recovery!

## FULL LEG “F-LIKE”

You feel it immediately! Feeling of well being, lightness and strength surrounding your legs from the ankle to the groin. The new FULL LEG will be your must-have training partner come summer or winter.

The FULL LEG is your second-to-none training and recovery aid.

Wear it as a leg warmer in autumn, winter and spring. It will protect you from the cold as well as offering you incredible compression.

Wear it under shorts for maximum recovery in the summer after full-on sessions. FULL LEG COMPRESSPORT® offers you both the beneficial effects of an R2 and a FORQUAD.

# (F-LIKE FULL LEG)

**MASSAGING-EFFECT FIBRE**

# FULL SOCKS

FULLSOCKS combine all the latest technologies in one sock ensuring athletes the best effects during effort while making the most of maximum recovery afterwards.

The COMPRESSPORT® Full Sock performs both during use and in recovery. Its graduated compression combined with the comfortable design optimises blood flow and stimulates venous return, also making it ideal for travel.

# FULL SOCKS COMPRESSION

## ULTRARESIST

In normal use COMPRESSPORT is tear proof.

## ULTRACONFORT

Woven fibres renowned for their softness and comfort.

## GRIP3D.DOT

The 3D.DOTS are multidirectional and ensure maximum grip in shoes thereby preventing feet from slipping during effort.

## THERMOAERATION

Air enters the 3D.DOTS which prevents the sole of the foot from overheating during effort.

## ARCHSTIM

Located in the arch of the foot, it also provides for venous return and recovery.

## QUALITY GUARANTEE

COMPRESSPORT guarantees the exchange of your product. ( see conditions on our website <http://www.compressport.com>)

## RUNNING

For road or trail running, the new FS3DD offers you the beneficial effects of compression and support of the ankle and stimulation of the arch of you foot.

## CYCLING

FS3DD is the indispensable recovery weapon for cyclists. It was the must-have during the 2010 Tour de France.

## ANTI-FATIGUE

The shock and vibration absorption on muscles, veins and joints increases resistance to effort.

## ACUPRESSURE

"The massaging acupressure" is designed to activate blood circulation by multipoint massaging of the sole area.

## RECOVERY

No pain after strain! COMPRESSPORT is used for recovery just after showering but also on long-haul flights or long car journeys.

## PRO RACING SOCKS

360° design to offer trail runners a new generation ultra technical sock.

Extremely light and exceptionally invigorating, the COMPRESSPORT® Pro Racing Sock acts both on posture hold and activation of microcirculation. Its wide and ergonomic toe piece, the stimulation of the arch of the foot, the 3D dots and the multi-compressive fibres will give you aggression and comfort during effort. The 3D dots also offer you a second-to-none shock-proof/breathing combination namely at the malleolus and Achilles tendon. Water is not stored in the protective cushions which guarantees you dry feet. The silver ion treatment is a bonus against perspiration and the spreading of bacteria. Your Pro Racing Socks are guaranteed for 2 years.

# ProRacingSocks

## ANATOMICALLY CORRECT

Specially designed for right and left foot in order to adhere to the anatomy of the foot and maintain your performances.

## ACUPRESSURE

"The massaging acupressure" is designed to activate blood circulation by multipoint massaging of the sole area.

## HEEL DOT

Facilitates positioning in the sock and ensures optimum positioning of sock.

## TOTAL WATER EXTRACY

The 3-D dots do not retain water (rain, hydration, perspiration) and facilitate its discharge. Feet stay dry.

## THERMOAERATION

Air enters the 3D.DOTS which prevents the sole of the foot from overheating during effort.

## QUALITY GUARANTEE

COMPRESSPORT guarantees the exchange of your product. ( see conditions on our website <http://www.compressport.com>)

## SHOCK ABSORBER

The external overwoven structure of the 3-D dots allows for adsorption and dampening over the shock areas.

## GRIP 3D.DOT

The 3D.DOTS are multidirectional and ensure maximum grip in shoes thereby preventing feet from slipping during effort.

## ARCHSTIM

Located in the arch of the foot, it also provides for venous return and recovery.

## ERGO FIT TECHNOLOGY

The toe piece contours and covers the toes without creasing, compressing or smothering the foot.

## ANTIBACTERIAL

The silver ions built into the fibre prevent perspiration and heating thereby eliminating odours, mycosis and blisters.

## ACHILLES TENDON

The 3D dots at the rear of the sock protect the Achilles tendon due to their "cushion" effect thereby preventing friction and pressure from the shoe.

## ARM SLEEVE “COMPRESSION”

The COMPRESSPORT® ProRacing ArmSleeve will become your new ally for every ride or race.

Our targeted Progressive compression guarantees improved venous return and shock absorption along the entire arm length. Blood circulation is improved, muscle vibration reduced, thus saving you energy during the effort.

Wearing your ProRacing Armsleeves after exercising will improve your recovery by reducing muscle soreness and eliminating lactic acid.

The 360 degrees SEAMLESS construction will guarantee a perfect fit. The elbow area has a specific non-compressive fabric for enhanced comfort.

Coupled with this is the effective temperature regulation: the COLDBLACK treatment prevents the body and the armsleeve heating up and guarantees a UPF of at least 30. In hot condition, your body does not have to expend energy to balance out the higher temperature. The special knitting also protects you from the cold and windchill. In any conditions, your ProRacing armsleeves are an easy way to regulate your arm/core temperature for any outdoor sport.

### MASSAGING-EFFECT FIBRE

Each movement triggers a micro massage providing a sensation of lightness and well-being. Patented fibre.

### SHOCK ABSORBER

The 360° seamless compression around the arm absorbs the "shock wave" effect on muscles, veins and joints. Less vibrations means delayed muscle fatigue. Your resistance to prolonged exertion is enhanced!

### DUAL ACTIVE COMPRESSION

The progressive compression acts on both muscular zones of your arm. Improved venous return and shock absorption is guaranteed along the entire arm length.

### PERFORMANCE

During exercise, the stimulation of blood flow increases oxygenation to the muscles. Your arms feel lighter and less strained.

### ULTRALIGHT + ULTRARESIST

Your COMPRESSPORT® Proracing Armsleeves do not retain water and will remain featherlight in all conditions. During normal use, your Armsleeves are tear-proof.

### MULTISPORT

Your Proracing Armsleeves are ideal for Running, Trail Running, Cycling, MTB. Use them for your recovery after swimming, a gym session or everyday as an effective UV protection garment.

### RECOVERY

Reduce muscle soreness, eliminate lactic acid and enhance your recovery by wearing your Proracing Armsleeves after showering (at home, in the office, on a plane,...)

### THERMOREGULATION

The special knitting protects you from the cold and windchill whilst still providing maximum breathability for your skin. The activation of microcirculation assists and supports the skin's thermo-regulating mechanism, therefore allowing you to save energy.

### MORPHOFIT

100% seamless, your Proracing Armsleeves are knitted to fit every curve of your arms perfectly, maximising their efficiency and comfort (no chafing).

### ANTIBACTERIAL

100% hygienic. The SANITIZED® treatment helps to prevent the growth of bacteria and naturally fights odours. It ensures a feeling of freshness all day long.

### COLDBLACK® - UV Protect

The COLDBLACK® treatment reduces heat build-up: the textile stays cool to the touch; the wearer perspires less, feels better and is capable of greater performance. It also provides reliable protection from UV rays and guarantees a minimum UPF 30 protection

## ARM FORCE “COMPRESSION”

The most versatile and ideal arm sleeve for training and racing in the autumn, winter and spring.

The 360 degrees SEAMLESS construction and our patented fibre work together to increase circulation and aid muscle performance and recovery.

The light graduated compression ensures enhanced blood circulation and muscle stability: By reducing muscle vibrations, your ArmForce arm sleeves will reduce fatigue and improve performance.

By accelerating blood circulation, your ARMFORCE arm sleeves reduce lactic acid and carbon dioxide build up resulting in enhanced recovery during and after the effort.

The special knitting protects you from the cold and windchill whilst still providing maximum breathability for your skin. The inside part of your armsleeve has a specific, more aerated woven structure to allow air to circulate freely, to ensure maximum ventilation and to wick moisture away instantly.

The built-in Sanitized® anti-bacterial treatment prevents the development of unpleasant odors.

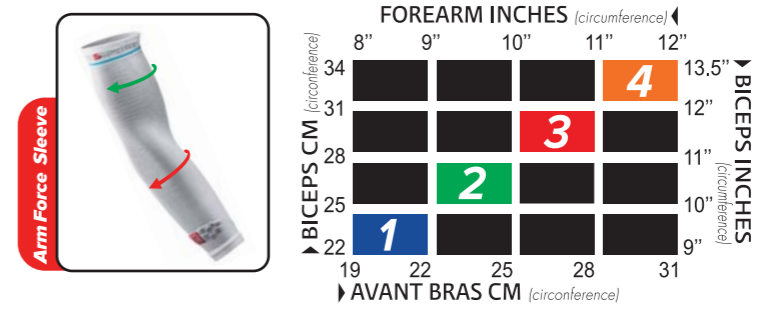

( **ARMFORCE** )

# TRIATHLON SHIRT

If you're looking for a shirt that is highly breathable, stays dry, doesn't irritate or chafe and is comfortable to wear in any climate, the COMPRESSPORT® Pro Triathlon Shirt is what you need, and like all Compressport products it is designed, tested and manufactured to offer not only comfort but maximum performance.

Developed with multiple Ironman champions, the Pro Racing Triathlon Shirt will ensure you stay comfortable and performing to your full potential even after 8 hours of racing.

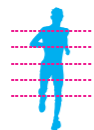

Designed with a unique 3D knitting pattern, it will improve accuracy and efficiency of movement. This leads to improved performance, including a more efficient running stride, and a better position on the bike by keeping shoulders aligned boosting breathing and oxygenation.

Tested in the harsh heat of the lava fields in Hawaii, the COMPRESSPORT Pro Racing Triathlon Shirt will keep you cool in the most extreme conditions

# proracing TRIATHLON SHIRT

## V-NECKCOLLAR

No more chafing and rubbing in sensitive areas. Its V-neck fits all sizes thereby preventing any discomfort around the neck.

## ERGOFIT

The body of your ProRacing TRIATHLON SHIRT is knitted to fit every curve of your body perfectly, maximising its efficiency and comfort (no chafing).

## THERMOREGULATION6.6

Its one-of-a-kind weave enhances air circulation enabling a perfect balance between the inside and outside of the shirt, so the body is always at the same temperature with no sudden surges or drops. Genuine protection in winter against the cold and in summer against the heat - it will become your second skin.

## POSTUREALIGNMENTLIGHTCOMPRESSION

This light compression area is directly woven into the fabric to:  
- Ensure you have correct body-positioning during long lasting effort  
- Ensure your shoulders stay aligned.  
And thereby boost breathing and improve oxygenation during effort as well as after to enhance your recovery.

## MASSAGING-EFFECTFIBRE

Each movement triggers a micro massage providing a sensation of lightness and well-being. Patented fibre.

## OEKO-TEX CERTIFIED

The innovative fibres used have the OEKO-TEX world-renowned inspection certificate. This certification declares that the fibres contain no chemical substances harmful to the skin.

## HYDROPHOBIC

The water-repellent fibre wicks moisture away and evacuates sweat without absorbing it, even when excessive. No more uncomfortable heavy, damp clothing that irritates and doesn't dry.

## VENTILATIONZONE

The targeted positioning of the mesh structures on the shoulders evacuate body heat and sweat meaning you stay dry regardless of the outside temperature and the intensity and duration of the effort.

## ULTRALIGHT

For optimum comfort, the microfibre body of the TRIATHLON SHIRT is seamless, lightweight (0,9 grams/cm3) and very soft. During effort, it will feel like you are wearing nothing. You will be lighter and faster!

## BACTERIOSTATIC

100% hygienic. This treatment helps to prevent the growth of bacteria and naturally fights odours. It ensures a feeling of freshness all day long.

## SEAMLESS

For optimum comfort, the microfibre body of the TRIATHLON SHIRT is 100% seamless, lightweight and very soft.

## V-POCKET

These deep pockets are designed to store gels, keys and even a telephone, and will stop objects from moving around. They also enable very easy access even when tired.

# TRIATHLON SHORT

The new compression Triathlon Shorts from COMPRESSPORT® are seamless, ultra lightweight, breathable and designed to optimise postural alignment.

They are comfortable when swimming, on the bike or during the run.

With the benefit of the thigh compression offered by the Compressport ForQuad coupled with a comfortable tri pad and non-compressive sections around the seat and waist for additional comfort, these shorts are the perfect choice for your next race or training session.

**TRIATHLON  
SHORT**

- ERGONOMIC POCKET**  
This clever opening doubles up as a pocket for gels, energy bars and even your smart phone! The convenient ergonomic design is great for cycling and running, avoiding unnecessary movement when reaching for your nutrition, even in TT position.
- HYDROPHOBIC**  
The water-repellent fibre wicks moisture away and evacuates sweat without absorbing it, even when excessive. No more uncomfortable heavy, damp clothing that irritates and doesn't dry.
- GRIP BIKE**  
The very fine external silicone printing ensures optimum bike saddle adherence.
- THERMOREGULATION 6.6**  
The fabric's unique weave enhances air circulation, enabling a perfect balance between the inside and outside of the shorts, so body temperature remains stable with no sudden surges or drops. It also provides genuine protection in winter against the cold and in summer against the heat - it will become your second skin.
- POSTURE ALIGNMENT LIGHT COMPRESSION**  
This light compression area is directly woven into the fabric to:
  - Ensure you have correct body-positioning during long lasting effort
  - Ensure your shoulders stay aligned. And thereby boost breathing and improve oxygenation during effort as well as after to enhance your recovery.
- DTOX**  
The targeted compression around the thighs enables the evacuation of toxins to avoid cramps and enhance your performance.

- ERGOFIT**  
The fibre and shape of your ProRacing TRIATHLON SHORTS are designed to fit every curve of your body perfectly, maximising efficiency and comfort (no chafing).
- VENTILATION ZONE**  
The front of the shorts has an extremely light, aerated mesh window. During movement air flows through it which increases ventilation, reduces sweating and improves thermoregulation. The generation of heat and moisture is therefore reduced (-45%) meaning you stay dryer, fresher and lighter for longer, preventing chafing and discomfort.
- ULTRALIGHT (T1)**  
A second-to-none combination of high-performance, compression and weight. The technology used by COMPRESSPORT® makes this short the lightest true compression triathlon short ever made (99 grs in T1).
- SHOCK ABSORBER**  
The seamless 360° compression around the thighs, buttocks and hips absorbs the "shockwave effect" on muscles, tendons and joints. The absorption of vibration delays muscle fatigue and enhances your resistance during prolonged exercise.
- MASSAGING FIBER**  
Each movement triggers a micro massage providing a sensation of lightness and well-being. Patented fibre.
- LOWCUT BELT**  
The specially designed low-cut shape allows free abdominal movement to help prevent stomach problems during prolonged exercise

SIZE (cm)	T1	T2	T3	T4
○ Top of quad	47-57	52-62	57-67	62-72
● Base of quad	33-39	36-42	39-45	42-46

### ANTIBACTERIAL

100% hygienic. The SANITIZED® treatment helps to prevent the growth of bacteria and naturally fights odours. It ensures a feeling of freshness all day long.

### FLAT-LOCKSEAMS

The Pro Racing TRIATHLON SHORT COMPRESSPORT is assembled with the latest generation flat lock seams. Solid and discreet, they avoid any chafing.

### SEAMLESSCOMPRESSION ZONE

The compression section of the Pro Racing TRIATHLON SHORT uses a tubular microfiber knit without any seams for targeted compression, freedom of movement and maximum comfort.

### TRIATHLONPAD

Inside, the ultra-thin Triathlon pad (exclusive COMPRESSPORT design) absorbs shocks when cycling and running. It is antibacterial, antifungal and avoids chafing between the legs.

### TRIATHLONPAD

The COMPRESSPORT fibre is exclusively woven on medical compression machines allowing for millimetre-precision compression graduation in targeted muscle areas. It enables the activation of blood flow, elimination of toxins, good knee alignment, shock absorption and reduces muscle vibrations.

## SWEATDOTS

As true moisture absorbers, they allow sweat to dry instantly and you can swipe the perspiration of your face with the back of the hand. The Dots do not retain water and the air that flows between them allows ultra fast drying!

## AEROKNITTING

The inside part of your Sweatband has a specific, more aerated woven structure to allow air to circulate freely, to ensure maximum ventilation and to wick moisture away instantly.

## MORPHOFIT

100% seamless, your COMPRESSPORT 3D.DOTS Sweatbands are knitted to fit your wrists perfectly, maximising their efficiency and comfort (no chafing).

## BACTERIOSTATIC

100% hygienic: The Meryl® Skinlife treatment helps to prevent the growth of bacteria and naturally fights odours. It ensures a feeling of freshness all day long.
